About “Climate Governance Pathway”

The course has been crafted based on the CGI Core Curriculum, a framework used for developing a professional education climate course as part of the education programme for board directors. It fulfils below objectives:

- To raise awareness of climate change and the science that underpins projections into the future and implications on people, the planet and the economy; to grasp the complexity and inter-connectedness of the system-level pressures and trends; and to recognise the urgent need for action to mitigate and adapt to climate change;
- To explore the potential risks and opportunities for businesses, including increasing climate litigation trends;
- To ensure board directors understand the policy and regulatory landscape for addressing climate change, including their director duties;
- To ensure board directors both learn and use a reflection and action planning approach for individual engagement interventions; and,
- To equip board directors with the basic information needed to ask critical questions:
 - to be able to effectively direct and oversee corporate strategy that includes climate objectives.
 - to ensure their business has appropriate measures in place to manage climate risk, set appropriately robust targets, and maximise strategic opportunities.
 - to collaborate with, and hold management accountable for, executing the adjusted business strategy and meeting both climate goals and milestones.

Facilitator:

Thierry Le Breton

Thierry Le Breton is the founder of Dynamia and a leading figure in sustainability in Mauritius and the Indian Ocean region. With a Political Science degree from the University of Lyon II and an MBA from Paris Dauphine, Thierry has pioneered sustainable development strategies for major corporations, focusing on aligning business operations with their geographical and ecological contexts. He has over 20 years of experience in managing sustainability projects, ranging from sustainable business innovation to green finance and waste management. As a recognized consultant, he has contributed to major projects, including Mauritius's first green bond, the first UNPRI reporting by a Mauritian firm, and the Social Impact Assessment following the Wakashio oil spill. His consulting firm, Dynamia, is the first Mauritian company to be B Corp certified, B Corp being a leading global standard for the certification of sustainable businesses. Thierry has been appointed B Corp Market Builder and, as such, promotes this standard in the region.

Overview

This program blends theory, finance, governance, and practical application using case studies, role-playing, real-world business exercises, and interactive learning tools.

Course Objectives

By the end of the workshop, participants will be able to:

Module 1: Climate Science and the Global Context of Climate Change

- Understand Climate Change: Science & Evidence
- Identify Climate Impacts on Society and Economics
- Understand the Global Climate Governance Landscape
- Apply the Mauritian Context of Climate Change

Module 2: Climate Risks & Financial Implications

- Understand Climate Risks in Business
- Understand Financial Implications of Climate Change
- Identifying Business Opportunities in Climate Transition

Module 3: Governance, Accountability and Disclosure

- Climate Governance at Board and Executive Levels
- The evolution of the reporting landscape
- Measuring and Reporting Carbon
- Setting up a Climate Roadmap

Module 4: Corporate Strategy Alignment & Climate Leadership

- Strategic Integration for Climate Transition

Modules of Climate Governance Pathway and training hours.

Modules	Hours
Climate Science and the Global Context of Climate Change	5
Climate Risks & Financial Implications	7
Governance, Accountability & Disclosure	7
Corporate Strategy Alignment & Climate Leadership	5

Profile of participants: Executive Directors, Non-Executive Independent Directors, Head of Sustainability ,Senior Executives, Senior Management, Aspiring Directors, Sustainability Coordinator.

ROUTES DESCRIPTION

ROUTE A: Full Pathway

Route A is designed for organisations and individuals at an early stage of their climate journey. It provides a full learning pathway across all four modules of the Climate Governance Pathway and is intended to build a comprehensive foundation in climate governance, climate-related risks, reporting, carbon measurement, strategy alignment, and climate leadership.

Under Route A, participants will complete the full programme, comprising all four modules delivered over a total duration of 24 hours.

Route A is suitable for organisations and individuals that:

- are at an early stage of their climate journey;
- have limited climate governance knowledge, experience, or internal capacity;
- require a structured learning pathway across all four modules of the Climate Governance Pathway;
- wish to build a strong foundation in climate science, climate-related risks, governance, disclosure, strategy alignment, and climate leadership;
- want to understand how climate considerations can be integrated into organisational strategy, governance, risk management, reporting, and decision-making; and
- wish to build readiness before engaging with Miod's climate-related toolkits and, where applicable, applying for the Corporate NDC Pledge.

Participants who successfully fulfill the requirements of the full programme will be awarded a Certificate of Completion in Climate Governance.

ROUTES DESCRIPTION

ROUTE B: Modular Training Pathway

Route B is designed for organisations and individuals wishing to select one or more selected modules from the Climate Governance Pathway.

This route provides flexibility for participants seeking targeted learning in specific areas of climate governance, climate-related risks, reporting, carbon measurement, strategy alignment, and climate leadership.

Route B is particularly useful for those who wish to explore the Climate Governance Pathway before committing to the full pathway, or who have specific capacity-building needs linked to their role, responsibilities, or organisational priorities.

Route B is suitable for organisations and individuals that:

- wish to attend one or more selected modules without enrolling in the full pathway;
- are seeking targeted professional development in specific areas of climate governance, climate-related risks, reporting, carbon measurement, strategy alignment, or climate leadership;
- require focused learning based on their current role, responsibilities, or capacity-building needs;
- wish to train selected staff, Board members, executives, sustainability coordinators, managers, or other relevant personnel on specific climate-related topics; and
- are not yet ready to pursue the full pathway but wish to begin building climate governance capability.

Participants who successfully fulfill the requirements of each module will receive a module-specific Certificate of Completion.

Pricing

ROUTE A:

Inaugural Price: MUR 60,000

Initial Price: MUR 75,000

ROUTE B:

Module 1 (5hr): MUR 15,000

Module 2 (7hr): MUR 22,000

Module 3 (7hr): MUR 22,000

Module 4 (5hr): MUR 15,000

Duration: 24 Hours (6 sessions)

Mode of delivery: Online
